

FLAME PRO

Care and Maintenance

THE NEW NORMAL

Does this describe you?

- Waiting until the last minute to organise washing your fire kit.
- Only washing your kit once every few years.
- You know you should check your kit for damage, but you're not sure how to.

You're not alone!

It's only recently that our industry has gained an understanding of the dangers of pathogens and the risks of dirty and uncared-for kit. There was a time when a sooty, stiff suit was a mark of pride. Now we know that this sort of treatment of kit puts firefighters at risk. Not just from damaged or poor performing garments but also from longterm contact with harmful pathogens. The regular cleaning and repair of fire kit is imperative.

Care and maintenance
with FlamePro.
SAFER. EASIER. SMARTER.

We understand what it means to be responsible for the lives of your firefighters, and the people they protect. We're on your side. Committed to spearheading new technologies, FlamePro is guaranteed to go the extra mile for you. Our mission is to make firefighters' jobs safer and easier, the world over. We know there is more to a suit than how much it can protect from heat. That's why we work closely with every customer to make sure they're getting the best option for every situation.

Every firefighter is important, every firefighter is different, and to us, it's firefighters that matter most.
